## I. Personal Statement

---

As of 1 September 2023 I began a Readership faculty position at [Newcastle University](#), UK. My primary research focus is asteroseismology of high- and intermediate-mass stars. The analysis of stellar pulsations reveals tight constraints on interior physics such as rotation, mixing and angular momentum transport. My expertise includes the extraction and analysis of photometric and spectroscopic data from space- and ground-based telescopes, and forward seismic modelling of pulsating stars. I am passionate about actively developing teaching at the BSc, MSc and PhD level, and advocacy and outreach activities for all ages and backgrounds. I currently hold a UKRI [Frontier Research Grant](#) (2023-2028; [EP/Y031059/1]) focussed on massive star asteroseismology.

My undergraduate studies at the [University of Birmingham](#) inspired me to pursue a research career in asteroseismology. I completed my PhD at the University of Central Lancashire in the UK under the supervision of Prof. Donald Kurtz, and my thesis was published as a [Springer monograph](#). In 2017 I became a postdoctoral researcher at [KU Leuven](#) in Belgium and in 2020 I was awarded a competitive 3-yr [FWO](#) research fellowship, during which I published several high-impact first-author papers including in [Nature Astronomy](#). I have won several prestigious prizes for research excellence, including the [Springer thesis prize](#) (2017), the [KU Leuven Research Council Award](#) in Science, Engineering and Technology (2020), the [Henri Vanderlinden Prize](#) of the Flemish Academy (2022), and the [George Darwin Lectureship](#) of the Royal Astronomical Society (2023).

### XIII. Public Engagement and Outreach

---

I am passionate about public engagement and outreach in science, but particularly in astronomy. I have organised and assisted in over 50 outreach events for school students and amateur astronomer societies in the UK and Belgium reaching thousands of people. It is enjoyable and rewarding to engage with young students and members of the public and discuss astronomy at various levels. I am dedicated to continuing to provide high-calibre outreach activities throughout my career.

During my PhD at UCLan in the UK, my outreach events included supervising dozens of trips for members of the public to visit the 0.7-m telescope at [Alston Observatory](#) and giving an interactive tours of the night sky using the modern planetarium. I also visited over 20 primary and secondary schools to give talks and run astronomy-themed group activities for classes of about 30 students aged 6–16.

Notable outreach activities I have performed during my time as a postdoc at KU Leuven included:

- Teaching Fellow of the [World Science Scholar](#) program of the World Science Foundation for the academic year 2022-2023, in which 60+ gifted and talented high school students from across the globe were selected to expand their mathematical abilities within inspiring university-level topics led by world-renowned scientists.
- Participant of the [Scientist@School](#) program, for which I provided over a dozen astronomy-themed talks and activities for local Belgian schools, with classes up to approximately 30 students aged 14–18.
- Participant of the [Skype a Scientist](#) program, for which I led over a dozen online astronomy discussions with international participants, including school classrooms and families.
- A series of short popular-science videos in collaboration with Huawei and Pint of Science Belgium for the “5-minute science you never knew” playlist of the ‘What Makes it Tick?’ YouTube channel.
- Interviewed for the Astronomer job profile for the UK [prospects career advice](#) website in 2021.
- Guest lecturer in stellar physics for the [Vereniging Voor Sterrenkunde Zomerschool](#) for 30–40 students aged 16–18 in August 2017, 2018 and 2020.
- Co-author of (Dutch) article for the September 2019 issue of the popular astronomy magazine [Heelal](#).
- Invited speaker at two [Pint of Science](#) events in Brussels on 7 and 21 May 2019, each with more than 150 attendees.
- Workshops on space exploration and the solar system at the KU Leuven [Kids University](#), for 30 students aged 8–13 on 5 May 2018 and 22 October 2022.
- Workshops on Exoplanets, Habitability and Host Star Variability for the [Ladies@Science](#) 2017 event, hosted at KU Leuven for 40 students aged 14–16 on 19 April 2017.
